Sabrina Y. Hu

San Francisco, CA | sabrinahu0618@gmail.com | (850) 345-2665 | in/sabrina-y-hu | Portfolio

Summary

MIT graduate in media studies and CS with experience in user research for education, teaching beginners to build, and shipping AI products as a PM. Interested in how AI can help people learn, communicate, and grow.

Education

Massachusetts Institute of Technology (MIT) | Cambridge, MA | May 2025

B.S. in Humanities and Engineering (Course 21E): Media Studies and Computer Science | GPA: 4.9/5.0

Relevant coursework: Artificial Intelligence (6.4100), Learning, Media & Technology (CMS.595), Imagination, Computation & Expression (CMS.627), Human-Centered Design (EM.S20), Current Debates in Media (CMS.701), Web Design (6.S063)

Honors: Phi Beta Kappa; ESG-PKG Social Impact Fellow; MIT Sandbox; Top 4, MIT Sloan PM Hackathon (2023)

Research & Human-Centered Design

NOMO | Product Manager Intern | Remote | Aug 2024 – Dec 2024

- Researched youth social media addiction via 110+ student surveys at a Snapchat-backed pre-seed startup
- Designed rewards and streak mechanics; prototype tests lifted click-through rate 22% and retention 16%

iCivics | User Research Intern | Remote | Jan 2024 – Feb 2024

- Interviewed 10 stakeholders and reviewed 5 competitors for a platform used by 9M+ students, 145K teachers
- Identified accessibility gaps in PDF-based classroom readings and prototyped a more usable digital reader

MIT Digital Humanities Lab | Design Engineer | Cambridge, MA | Feb 2023 – May 2023

- Interviewed 16 exiled Ukrainian scientists in 15 countries to scope a diaspora communication platform
- Co-designed and built the platform (Django, Bootstrap) with a cross-functional team, serving 224 scientists

MIT Self-Assembly Lab | Undergraduate Researcher | Cambridge, MA | Jan 2022 – Feb 2022

- Prototyped a transformable bag for Hussein Chalayan using Rhino CAD and 3D-printed self-assembling beads
- Programmed two robots to simulate thousands of steps on laser-cut shoe models to study how footwear wears

Product & Technical Experience

Nooks | Product Manager | San Francisco, CA | May 2026 – Oct 2026

- Took Plays (AI workflow automation) from beta to GA; used customer interviews and workflow observation to launch AI-assisted Play building, driving 2.6× adoption in 6 weeks and 70% fewer failures
- Defined a 0-to-1 autonomous AI agent, including human handoff and customer-specific guardrails; co-designed V1 with 4 enterprise design partners and led execution across 3 engineering teams

Samsara | Associate Product Manager | San Francisco, CA | Aug 2025 – May 2026

- Led 0-to-1 development of a messaging and calling platform for 800K monthly active drivers; prototyped it in Figma Make to align leadership and launched at Samsara's annual conference (5,000+ attendees)
- Built an LLM evaluation framework (quality rubrics, automated regression tests) for the AI Driver Assistant
- Designed the communications API layer (contracts, routing, identity), unlocking $300K+ ARR in integrations

MITRE | Digital Hardware Intern | Burlington, MA | May 2022 – Aug 2022

- Selected as 1 of 20 from 100 applicants for the Massachusetts Microelectronics Internship Program; developed trojan AES chip designs to monitor and track active and inactive trojans with OpenLane and eFabless

Teaching & Outreach

Haileybury and Imperial Service College | Design & Technology Research Fellow | Hertford, UK | Jun 2023 – Aug 2023

- Designed and taught a 2-week web development course for 24 international students with no CS background; every student built, launched, and presented a personal website
- Advised 30 student projects in the Design & Innovation Program and suggested changes for future cohorts

MIT EECS Department | Lab Assistant | Cambridge, MA | Sep 2023 – Dec 2023

- Gave supplemental instruction to ~500 beginners in Intro to Python and Computational Thinking & Data Science

Pear VC | Venture Fellow | Cambridge, MA | Oct 2023 – May 2024

- Co-created the Pear Product Cohort, giving 20 student engineers case studies, CEO talks, and launch resources
- Organized a 6-panelist event that sourced 65 female founders; helped drive a record 33 MIT applications

Ventures & Selected Projects

Solar Capital | Founder & Inventor | Cambridge, MA | Jun 2020 – May 2025

- Invented a solar-powered UVC water-purifying bottle cap that eliminated 99.46% of pathogens in 4 minutes; Regeneron ISEF finalist, Spellman HV Clean Tech Top 10, MIT IDEAS Social Innovation finalist
- Led 4 mechanical and electrical engineers across MIT D-Lab and Urban Risk Lab, secured $10K+ in MIT funding, and transitioned the product to the Bosai Plus disaster-relief marketplace

Chat To Go | Full-Stack Developer | Mar 2023 – May 2023

- Built a location-based chat web app with map search and navigation, shaped by user interviews and testing

Banana Lounge | Documentary Maker | Sep 2022 – Nov 2022

- Produced, filmed, and edited a short documentary on MIT's 24/7 free-banana student space; MIT in 3:00 finalist

Foodie | Project Leader, HackMIT 2022 | Oct 2022

- Led design and build of a social food-recommendation app with feeds and Google Maps; top 10 of 300 teams

Skills

- **Research & Design:** user interviews, surveys, usability testing, prototyping, human-centered design, Figma
- **AI & Product:** AI agent design, human handoff and guardrails, LLM evaluation, conversational systems
- **Technical:** Python, JavaScript, HTML/CSS, SQL, Django, Cursor
- **Languages:** Mandarin Chinese (intermediate)
